Please find below and/or attached an Office communication concerning this application or proceeding.

	Application No.	Applicant(s)				
	10/694,913	SASAKI, GEN				
Office Action Summary	Examiner	Art Unit				
	Nhan T. Tran	2622				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address						
Period for Reply A SUCRIENCE STATUTORY DEPIOD FOR REDLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (20) DAYS						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1) Responsive to communication(s) filed on 10/29	Responsive to communication(s) filed on <u>10/29/2003 & 1/29/2004</u> .					
· —	,—					
	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is					
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.						
Disposition of Claims						
4)⊠ Claim(s) <u>15 and 16</u> is/are pending in the application.						
4a) Of the above claim(s) is/are withdrawn from consideration.						
5) Claim(s) is/are allowed.						
6) Claim(s) 15 is/are rejected.						
7)⊠ Claim(s) <u>16</u> is/are objected to. 8)□ Claim(s) are subject to restriction and/or election requirement.						
Application Papers						
9) The specification is objected to by the Examiner.						
10)⊠ The drawing(s) filed on <u>29 October 2003</u> is/are: a)⊠ accepted or b)□ objected to by the Examiner.						
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).						
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.						
Priority under 35 U.S.C. § 119						
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).						
a) ⊠ All b) ☐ Some * c) ☐ None of:						
1. Certified copies of the priority documents have been received.						
2. Certified copies of the priority documents have been received in Application No. 09/459,574.						
3. Copies of the certified copies of the priority documents have been received in this National Stage						
application from the International Bureau (PCT Rule 17.2(a)).						
* See the attached detailed Office action for a list of the certified copies not received.						
Attachment(s)						
1) Notice of References Cited (PTO-892) 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)	4) Interview Summary Paper No(s)/Mail Da

Art Unit: 2622

DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/459,574, filed on 12/13/1999.

Information Disclosure Statement

2. The information disclosure statements (IDS) submitted on 10/29/2003 & 1/29/2004 are is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statements are being considered by the examiner.

Specification

- 3. Amendment to specification filed 10/29/2003 to include the paragraph of "This application is a divisional of co-pending U.S. Patent Application No. 09/459,574, filed December 13, 1999, the entire contents of which are hereby incorporated herein by reference." is acknowledged and accepted.
- 4. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Objections

5. Claim 16 is objected to because of recitation of "the rearmost stage of said shift register" (preliminary amendment, page 4, line 1) and recitation of "the foremost stage" (preliminary amendment, page 4, line 6). These limitations should be corrected as --a rearmost stage of said shift register-- and --a foremost stage of said shift register--, respectively.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States
- 6. Claim 15 is rejected under 35 U.S.C. 102(b) as being anticipated by Kapan (US 5,047,863).

Regarding claim 15, Kapan discloses an image processing circuit of an image input device (Fig. 1) which performs a predetermined image processing (amplifying) of image photographed by an image pickup device in said image input device, said circuit comprising:

a real time processing unit (combined circuits 20-26) in which a predetermined general image processing of a pixel data being photographed by said image pickup

Art Unit: 2622

device and inputted sequentially is performed by real time processing (see Fig. 1; col. 2, lines 21-44); and a main memory (36) that stores a pixel data outputted from at least said real time processing unit (20-26), in image frame units (col. 2, line 65 – col. 3, line 7; note that each line of pixels produces an image frame since image frames are not clearly defined in the claim), and wherein, said real time processing unit further comprises a defective pixel compensation block (26) that reads defective pixel addresses (via switch enable line from control processor 34) stored in said main memory (36) disposed outside of said real time processing unit, and performs defective pixel compensation (by switching to either amplifier 22 or 20) when a pixel address of a pixel data residing in image matches said defective pixel address. See Fig. 1 and col. 2, line 59 – col. 3, line 62.

Allowable Subject Matter

7. Claim 16 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. *Note that correction required in claim objection in section 4 shall be complied.*

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to teach or fairly suggest the limitations of claim 16, in combination with independent claim 15, that includes "...said defective pixel compensation block of said real processing unit comprises: a shift register with a

Art Unit: 2622

plurality of registers connected in series, to which defective pixel addresses stored in said main memory are inputted sequentially; a comparator connected to [the] rearmost stage of said shift register in which an address count value of a pixel data inputted sequentially is compared with a defective pixel address provided from the said rearmost stage and, when a match is formed, a defective pixel timing signal is outputted, characterized in that: said shift register holds a defective pixel address, and output of the said rearmost stage is looped to an input terminal of [the] foremost stage; said comparator is a comparator in which an address count value of a pixel data inputted sequentially is compared with a defective pixel address provided from the said rearmost stage and, when a match is found, a shift timing signal and a defective pixel timing signal are outputted; and shift of said shift register is executed by said shift timing signal provided from said comparator."

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nhan T. Tran whose telephone number is (571) 272-7371. The examiner can normally be reached on Monday - Thursday, 7:30am - 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Ometz can be reached on (571) 272-7593. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
